Auditorium

Welcome

Did you know that if a student does not take STAAR, STAAR-M or STAAR-Alt they will need an alternate route to attain their diploma? Come find out on March 29th about the opportunities available through RISD Transition Services. Richardson Independent School District has one of the **BEST** Transition Programs in the state.

We connect students to careers and the community. It is the bridge to life after high school. Successful transitioning starts NOW! It is never too early to begin looking towards the future. The program serves students in all special education programs.

Come hear how students and parents have made Transition Services work for them.

Take a few steps in your students lives.

Graduation Options

Do you know how your child will earn their diploma? Do you know which STAAR test they are taking? Do you know about DARS? Do you know about Metro Care?

Self-Determination

Does your child have opportunities to learn life lessons through natural consequences? How would these life lessons help in their future vocational experiences and proper integration in the community?

Parent & Student Responsibilities

Do you give your child the opportunity to make choices? What choices should they be making? Are you asking your child what are their goals for the future? What actions are you taking to help them reach those goals.

Community Safety

How does the family establish a safety net for their child as they access the community, school and work? Is your child safe at home alone? Can your child cross the street safely?

Questions & Answers

We anticipate there will be several questions and hopefully our guest speakers can answer these concerns. However, if more clarification is needed, we have a group of staff members available to answer individual questions.
